

Aditya Kirar

Guna, Madhya Pradesh, India — +91-7878861554 — mr.kirar62@gmail.com

Portfolio — LinkedIn — GitHub — LeetCode

Professional Summary

Results-driven Full-Stack Developer specializing in the MERN stack with hands-on experience building secure, scalable, and production-ready web applications. Proficient in REST API design, JWT authentication, MongoDB optimization, and responsive frontend development. Strong problem-solving foundation in Data Structures and Algorithms with consistent competitive programming practice. Passionate about writing clean, maintainable code, implementing security best practices, and deploying end-to-end applications.

Education

Jaypee University of Engineering and Technology

Guna, MP

B.Tech in Computer Science and Engineering

2023 – 2027

Relevant Coursework: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Vidisha Academy

Vidisha, MP

Higher Secondary (Class XII), 88%

2020 – 2021

Magdham International School

Vidisha, MP

Secondary (Class X)

2019 – 2020

Technical Skills

Languages: C++, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL

Frontend: React.js, Bootstrap, EJS, Responsive Web Design, DOM Manipulation, CSS Flexbox, CSS Grid

Backend: Node.js, Express.js, REST API Development, MVC Architecture, JWT Authentication, Cookie-based Sessions

Databases: MongoDB, MongoDB Atlas, MySQL, Mongoose ODM, Database Indexing, Query Optimization

Core CS: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering

Tools: Git, GitHub, VS Code, Postman, Chrome DevTools, Render, Vercel, Netlify, Agile, Scrum

Security: Helmet.js, Express Rate Limiting, Input Validation, XSS Prevention, CSRF Protection, Bcrypt Hashing

Experience

Codec Technologies

Remote

Web Development Intern

June 2025 – August 2025

- Developed responsive web interfaces using HTML5, CSS3, and JavaScript with cross-browser compatibility and mobile-first design.
- Collaborated with cross-functional teams on frontend UI implementation, debugging, and code reviews using Git and GitHub.
- Followed agile workflows including sprint planning and daily stand-ups to deliver features on schedule.

Projects

URL Shortener Platform

Node.js, Express.js, MongoDB Atlas, JWT, EJS, Render

GitHub — Live Demo

- Problem:** Users needed a secure way to shorten URLs with analytics. **Solution:** Built full-stack URL shortening service with JWT auth and user dashboards.
- Implemented secure signup/login with cookie-based sessions, Helmet.js headers, and Express rate limiting to prevent abuse and DDoS.
- Designed MongoDB schema with Mongoose ODM and indexing; optimized queries for sub-100ms redirection latency under concurrent load.
- Built responsive glassmorphism UI with EJS templating and deployed on Render with environment variable configuration.

Smart Placement Portal

React.js, Node.js, Express.js, MongoDB, JWT, REST API

GitHub

- Problem:** Colleges lack a unified platform for managing campus placements. **Solution:** Engineered full-stack platform with role-based dashboards.
- Implemented RBAC with JWT authentication and secure RESTful APIs following MVC architecture with Bcrypt encryption.
- Built modular React dashboards with reusable components, protected routes, and state management for real-time updates.

Achievements and Coding Profiles

- Active competitive programmer on LeetCode (@DarkRecursion) with strong command over Arrays, Strings, Binary Search, Recursion, Stack, Queue, Heap, and Linked List.
- Maintained 12+ repositories on GitHub (github.com/Adityakirar04) with multiple full-stack MERN projects.
- Developed end-to-end web applications with focus on writing clean, maintainable code and delivering optimal user experience.
