

Aditya Kirar

Guna, Madhya Pradesh, India | +91-7878861554 | mr.kirar62@gmail.com

Portfolio | LinkedIn | GitHub | LeetCode

Professional Summary

Results-driven Full-Stack Developer specializing in the MERN stack with hands-on experience building secure, scalable, and production-ready web applications. Proficient in REST API design, JWT authentication, MongoDB optimization, and responsive frontend development. Strong problem-solving foundation in Data Structures and Algorithms with 300+ problems solved on LeetCode. Passionate about writing clean, maintainable code and deploying end-to-end solutions.

Education

Jaypee University of Engineering and Technology			Guna, MP
B.Tech in Computer Science and Engineering			2023 – 2027
<i>Relevant Coursework:</i> Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems			
Vidisha Academy Senior Secondary	Vidisha, MP	Higher Secondary (Class XII)	2020 – 2021
Magdham International School	Vidisha, MP	Secondary (Class X)	2019 – 2020

Technical Skills

Languages: C++, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL **Frontend:** React.js, Bootstrap, EJS, Responsive Web Design, DOM Manipulation, CSS Flexbox, CSS Grid

Backend: Node.js, Express.js, REST API Development, MVC Architecture, JWT Authentication, Cookie-based Sessions

Databases: MongoDB, MongoDB Atlas, MySQL, Mongoose ODM, Database Indexing, Query Optimization

Core CS: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Tools: Git, GitHub, VS Code, Postman, Chrome DevTools, Render, Vercel, Netlify

Security: Helmet.js, Express Rate Limiting, Input Validation, XSS Prevention, CSRF Protection, Bcrypt Hashing

Experience

Edulite Solutions	Remote
<i>Full Stack Web Development Intern</i>	May 2026 – June 2026

- Developed responsive web interfaces using React.js, HTML5, CSS3, and JavaScript with cross-browser compatibility and mobile-first design principles.
- Built RESTful APIs using Node.js and Express.js with JWT-based authentication and role-based access control for different user types.
- Designed and optimized MongoDB schemas using Mongoose ODM with proper indexes and aggregation pipelines to improve query performance.
- Collaborated with cross-functional teams on frontend UI implementation, debugging, and code reviews using Git and GitHub.
- Followed agile development workflows including sprint planning and daily stand-ups to deliver features on schedule.

Projects

URL Shortener Platform	GitHub Live Demo	<i>Node.js, Express.js, MongoDB Atlas, JWT, EJS, Render</i>
- Architected a full-stack URL shortening service with JWT authentication, user-specific dashboards, and real-time click analytics tracking. - Implemented secure signup/login with HTTP-only cookie-based sessions, Helmet.js security headers, and Express rate limiting to prevent abuse. - Designed MongoDB schema with Mongoose ODM and compound indexing; optimized queries to achieve sub-100ms redirection latency under concurrent load. - Built responsive glassmorphism UI with EJS templating and deployed on Render with environment variable configuration.		

Smart Placement Portal	GitHub	<i>React.js, Node.js, Express.js, MongoDB, JWT, REST API</i>
- Engineered a full-stack placement management platform with interactive role-based dashboards for students, coordinators, and administrators. - Implemented React-based modular dashboards with reusable components, protected routes, and state management for real-time updates. - Designed secure RESTful APIs following MVC architecture with Bcrypt password encryption, input validation, and JWT token verification middleware. - Created MongoDB collections for students, companies, job postings, and applications with proper referential integrity and aggregation pipelines.		

Certifications

- Data Structures and Algorithms** – Springboard (Certified)
- Full Stack Web Development with MERN** – Udemy (Certified)

Achievements & Coding Profiles

- Solved 300+ Data Structures and Algorithms problems on LeetCode with strong command over Arrays, Strings, Binary Search, Recursion, Stack, Queue, Heap, and Linked List (@Aditya_Kirar04).
- Maintained 12+ repositories on GitHub with multiple full-stack MERN projects (github.com/Adityakirar04).
- Developed end-to-end web applications with focus on writing clean, maintainable code and delivering optimal user experience with security-first architecture.
